Electrical wiring is an electrical installation of cabling and associated devices such as switches, distribution boards, sockets, and light fittings in a structure. Wiring is subject to safety standards for design and installation. Allowable wire and cable types and sizes are specified according to the circuit operating voltage and electric current capability. With further restrictions on the, this will increase student engagement and accelerate practical application of residential wiring concepts. The simulation includes 7 basic wiring circuits plus an entire house environment with 11 separate rooms including bedrooms, kitchen, bathrooms, and basement.
