and get stuck in the social landscape is becoming increasingly fragmented and it's getting more and more difficult for marketers to know where to invest their time, effort, and money when creating content or buying media. In sociology, social interaction is a dynamic sequence of social actions between individuals or groups who modify their actions and reactions due to actions by their interaction partner. Social interactions can be differentiated into accidental, repeated, regular, and regulated. Editors note: this social media definition post was originally published on May 9, 2011. At the time, the post contained 30 social media definitions. Since then, the content was significantly expanded with new data and input from other marketers. Further, many of the original contributors updated their definitions.

Social interaction is not defined by type of physical relation or behavior or by physical distance. It is a matter of a mutual subjective orientation towards each other. Thus, even when no physical behavior is involved as with two rivals deliberately ignoring each other's professional work, there is social interaction. Moreover, social interaction occurs even when the social structure in which it occurs need not be something that exists for an extended period of time. As noted, a social structure can include a long-standing organization like a church but it can also include a group of friends out for a night on the town. Social interaction also requires a mutual engagement. Social constructionism is a social theory about how meaning is created through social interaction through the things we do and say with other people. This theory shows that gender is not a fixed or innate fact but instead it varies across time and place.

A social networking service, also known as a social networking site or SNS or social media, is an online platform which people use to build social networks or social relations with other people who share similar personal or career interests, activities, backgrounds, or real life connections. The social network is distributed across various computer networks. Social media is a phrase that we throw around a lot these days, often to describe what we post on sites and apps like Facebook, Twitter, Instagram, Snapchat, and others. So, you can infer that social media are web based sites that allow people to interact with each other. Social networking didn't start with Facebook. We examine the history of social networking from BBSes and Friendster to Diaspora and beyond.

Scholarship after defining social media explores developing technological, social, and communicative features that will alter and stabilize social media interactions in the future. Finally, we divine and prioritize several directions for the field as it seeks to develop, validate, and apply theories of social media between now and 2035.
