Fpnotebook.com is a rapid access point of care medical reference for primary care and emergency clinicians. Started in 1995. This collection now contains 6664 interlinked topic pages divided into a tree of 31
Male GU exam: A normal male genitourinary exam would be dictated as follows: the testicles are descended bilaterally, they are firm, non-tender, and without masses or lesions. No penile lesions are noted, and there is no discharge from the urethra. The scrotum is without induration, erythema, or edema. No hernias are palpated in the pelvic exam.

Terminology to document findings: Use terms from the FGTT and the pelvic exam case report forms. When the term from the case report form is more specific than the term from the FGTT, use the term from the case report form. Use routine QC/QA opportunities to help ensure consistency of terminology across staff and exams.
