This seminar offers an insight to the linkages between various aspects of the APQP process specifically the development and linkage of process flows and control plans. It shows how process flows, control plans, and shop floor documentation can be used to achieve process standardization and improvement.

How to use it: You can document existing processes in the given format, audit your system, and prepare for the registrar audit. You will need to determine whether your current registrar is IATF recognized to audit your facility to ISO/TS 16949:2002.

The heat treat work group is developing the 4th edition of the heat treat assessment. This new edition will focus on clarification to the process tables and pyrometry requirements and a major change to the formatting of the assessment from Excel to a Word format to allow for greater flexibility in writing observations and notes and will include hyperlinks to the process tables.

The seminar will give you the clear understanding of the quality management systems and the seminar provides you the clear instruction in internal auditor training.
