an integrated suite of tools to manage their dynamic engineering design basis building on this success and leveraging the power of new service oriented technologies, intergraph introduces smartplant enterprise for owner operators spo.

... adds value to handovers to owner operators product detail. Smartplant instrumentation tools has become the instrumentation information management solution of choice for the process and power industries, ENI uses intergraph for GOLiat development in Norway Smartplant enterprise for owner operators is specifically designed for asset owners to enhance plant safety reliability and interoperability while ensuring information integrity across the owner operator system landscape, Iatec plant solutions develops technical and management solutions for the engineering amp construction sector and provides information management services for the power amp process industry, next generation technology to be used for ground breaking Santos GLNG project Huntsville Ala Aug 28 2012 Intergraph has won a contract with leading Australian energy company Santos for the use of Smartplant enterprise for owner operators spo along with other Smartplant enterprise, Smartplant cloud provides rapid deployment robust security and a dynamically scalable environment that has been designed to specifically support all sizes of projects and assets for both the owner operators and EPCs regardless of global location, View ing Steven Convens Revit i PDMS i Smartplant i E3DS profile on LinkedIn the world's largest professional community ing Steven has 1 job listed on their profile see the complete,
smartplant enterprise for owner operators solutions spo helps you maintain the integrity of your engineering information and leverage it to ensure safe compliant and efficient operations. Watch administration experience of smartplant enterprise spe applications particularly s3d spel is desirable but not essential experience of implementation and support of smartplant construction and smartplant owner operator systems understanding of the data and document deliverables created and managed on e amp c projects.

smartplant enterprise for owner operators leverages the engineering design basis to provide an extensive portfolio of integrated pre configured solutions addressing key owner operator work processes across the plant life cycle. Smartplant instrumentation 2013 has got powerful capabilities that has enhanced the productivity and improve the quality of engineering procurement and construction and owner operator companies this application enhances the to do list with some intuitive user controls and management tools.

Santos a major australian owner operator has chosen to adopt smartplant enterprise for owner operators and the integrated suite of smartplant enterprise solutions this partnership validates intergraphs global leadership in the oil
intergraph technology worldwide, timely safe owner operator project close outs meaningful project progress reporting quick amp seamless access to spi deliverables bulk printing to pdfs or printers, smartplant enterprise for owner operators an extensive portfolio of integrated pre configured solutions addressing key owner operator work processes across the plant life cycle projects performance full life cycle project controls solution, smartplant enterprise for owner operators spo supports project information handover and the integration of engineering data from contractors enabling you to organize and manage information during operations and maintenance download this webinar originally held on september 25 2014 to learn how lumina copper in its us 4 2 billion caserones
project in Chile has developed a watch this video from Intergraph to learn how SmartPlant Enterprise can help oil and gas owner operators manage access and optimize facility engineering infrastructure. Benefits for OOS and EPCs SmartPlant Explorer is appropriate for use by both the engineering procurement and construction EPC contractor and owner operator. As an example of use by the EPC, the project manager accesses the P&ID through SmartPlant Explorer to learn the status of project progress. To help meet these demands Intergraph offers SmartPlant Enterprise for owner operators (SPO). SPO leverages the engineering design basis to offer a number of business benefits. An extensive portfolio of integrated pre-configured solutions address key owner operator work processes across the facility lifecycle. Iatec Plant Solutions develops technical and management solutions for the engineering and construction sector and provides information management services for the power and process industry. SmartPlant Enterprise for owner operators (SPO) solution is modularized to address best deployment strategies focused on meeting requirements raised by good industry practices. Details of each module can be found in the videos and materials on this page.
Intergraph has won a contract with leading Australian energy company Santos for the use of SmartPlant Enterprise for Owner Operators (SPO) along with other SmartPlant Enterprise solutions. Santos will use Intergraph technology to manage its existing facilities and those in its GLNG project in Australia.

SmartPlant Enterprise for Owner Operators has not provided pricing information for this product or service. This is common practice for software vendors and service providers. Contact SmartPlant Enterprise for Owner Operators to obtain current pricing.

Do you work for SmartPlant Enterprise for Owner Operators?

SmartPlant Enterprise for Owner Operators leverages the engineering design basis to provide an extensive portfolio of integrated pre-configured solutions addressing key owner operator work processes across the plant life cycle.
providers contact smartplant enterprise for owner operators to obtain current pricing, and coupled with a set of proven and robust engineering data management capabilities intergraph smartplant is the leading engineering and information management solutions provider to major oil and gas industry owner operator that deploy smartplant as their corporate standard
