x 2 per week in therapy setting child also kept on the go by not being in wheelchair unless absolutely necessary for transport for mobile girls, pediatric occupational therapy
In the classroom, teachers need more smart goal ideas based on the Common Core standards. Goal setting in occupational and physical therapy requires understanding the child’s progress towards the goals in the intervention plan, sensory issues, and the IEP. Lindsey Biel, OTR/L, suggests requesting an occupational therapy evaluation while some strategies and accommodations can be worked out informally with cooperative teachers. Others need to be negotiated with the school and added to the IEP to ensure compliance.

Occupational therapists at a 0-3 early intervention program manage two occupational therapists who oversee the physical therapy services. This service has been provided by the occupational therapy department for over ten years and is managed by therapists at a 0-3 early intervention program. The goal of the occupational therapy program is to establish that the skills of an occupational therapist contributed to the child’s progress towards the goals in the intervention plan, sensory issues, and the IEP.

The IEP should request an occupational therapy evaluation while some strategies and accommodations can be worked out informally with cooperative teachers. Others need to be negotiated with the school and added to the IEP to ensure compliance. Sensory smart goals are based on the Common Core standards.
