Experiential Learning: Kolb’s Learning Theories

Kolb’s experiential learning theory is a holistic perspective that combines experience, perception, cognition, and behavior. It is a four-stage cyclical model that describes the process of learning and how individuals acquire new knowledge and skills. The model consists of four stages: concrete experience, reflective observation, abstract conceptualization, and active experimentation. These stages are repeated in a cycle, allowing for continuous learning and growth.

April 28th, 2019

Kolb’s experiential learning theory works on two levels: one cycle of learning and four separate learning styles. For example, social networking educational experiences at the basic experiential stage are aimed at increasing individual and group challenges and opportunities for learning and interaction with the environment as opposed to reading, writing, and understanding.

Introduction to get a background of learning styles

While VAK may have popularized learning styles, David Kolb, Professor of Organizational Behavior at Case Western Reserve University, developed a more comprehensive model of learning styles. Kolb’s learning styles are based on a four-stage cycle of learning: concrete experience, reflective observation, abstract conceptualization, and active experimentation. These stages are repeated in a cycle, allowing for continuous learning and growth.
