Fast Fashion Sensing Technology is a project meant to design, experiment with, and implement an ICT tool that could monitor and analyze the activity of Italian emerging fashion brands on social media. Fast aims at providing SMEs in the fashion industry with the ability to better understand and measure the behaviours and opinions of consumers on social media through the study of the documents used in researching this project. This study has not been carried out with the rigour which would usually characterise an academic research subject.

At the St. Regis Abu Dhabi Corniche Hotel the event presentations about the future plans, progresses, and visions of the Emirate were held. The Pharmacy Learning Resource Center (LRC) is located on the lower level of the Eugene Applebaum College of Pharmacy and Health Sciences, room 0330. There's more to measuring a brand than just asking if people like it. Customers generally progress through stages when forming relationships with brands. This is often called the hierarchy of effects, while different models describe the hierarchy of effects in general. Customers may go from:
