desert bank excel 2010, problems in using nested
if function i am trying to use nested if functions
excel is recognising and calculating correctly for
first two if s but then after that it uses the
multiplier from second if c8 to calculate from
there on totally disregarding the formula in
subsequent if s c9 etc, step by step help we use
cookies to optimize the experience on our website
by continuing to use our website you are agreeing
to our use of cookies, using excel s built in
solver product mix example understanding the excel
solver dialogs to let the excel solver know which
cells on the worksheet represent the decision variables, constraints, and objective function. We click the solver button on the Excel data tab or the premium solver button on the add-ins tab, which displays the solver parameters dialog. The tutorial explains how to add and where to find solver in different Excel versions from 2016 to 2003. Step-by-step examples show how to use Excel solver to find optimal solutions for linear programming and other kinds of problems.
