How to write a SOAP note: SOAP notes are a style of documentation that medical professionals such as nurses, therapists, athletic trainers, counsellors, and doctors use to record information about patients. The acronym stands for: SOAP:

- Subjective: information collected from the patient.
- Objective: physical examination findings.
- Assessment: conclusions drawn from the subjective and objective information.
- Plan: actions taken or planned.

Some practitioners approach sports physicals as thorough periodic health evaluations whereas others consider these evaluations to be risk-based screening examinations. Neither approach is perfect, and no universal standard exists for what constitutes an adequate or appropriate evaluation for this population. Physical therapy documentation examples abound online. A question many of the therapists who use MedTravelers services often ask is how they can choose the best SOAP note examples for their own practice. Detailed SOAP notes matter because creating and sharing detailed SOAP notes improve the quality of patient care.
complete and easy to understand documentation makes a world of difference in terms of, the soap note an acronym for subjective objective assessment and plan is a method of documentation employed by health care providers to write out notes in a patient's chart along with other common formats such as the admission note. see attached below samples of soap notes from patients seen during all three practicums

soap 10 abdominal pain doc 59k jennifer dyott aug 7 2013 1 19 pm v 1
