A review of the research on practical work in school science. Foreword: It is often argued that practical work is central to teaching and learning in science and that good quality practical work helps develop pupils' understanding of scientific processes and concepts. The UK has a long tradition of high-level science education, and the government's STEM high level agenda has been well-received.

However, I want to tell a personal story. At the end of the semester, my lab group worked extremely hard and turned in a very solid final project which she gave a 60% on, worth 30% of the final grade because she said 1 page was out of order in the binder filled with 40 pages.
