Mr. William Dokianos has over 35 years experience in engineering production and pipeline. He is a Professional Engineer in the states of Louisiana and New Mexico and holds a general and commercial contractor license in the state of New Mexico.

Abstract

Compared with other electrical heating processes, rf heating has the advantages of volumetric heating therefore it has great development potential in extracting heavy oil resources because the electromagnetic waves used to heat reservoir are mainly de.

Petroleum engineering handbook volumes I through VI are available as a print set and digital edition.

In this reservoir engineering course important concepts that will be covered include the reservoir life cycle, reservoir environment and formation properties, Darcy's Law and API correlations.

Reservoir simulation models are used by oil and gas companies in the development of new fields, upgrades or altered operational strategies.

How fluid and rock properties affect production rates in a reservoir is discussed in this course.

DGI Software for Visualization Well Engineering:

Updated modules that eliminate the need for the MKS toolkit.

EarthVision 10 provides an enhanced interface for generating well curve displays, shapefile import enhancements, bug fixes and many general visualization changes and enhancements.

Practical Enhanced Reservoir Engineering:

The petroleum engineering handbook has long been recognized as a valuable comprehensive reference that offers practical day to day applications for students and experienced engineering professionals alike.

Practical Enhanced Reservoir Engineering:

April 20th, 2019 - In this reservoir engineering course important concepts that will be covered include the reservoir life cycle, reservoir environment and formation properties, Darcy’s Law and API correlations.

The Petroleum Engineering Handbook is a series of 7 volumes sold individually or as a complete set. Volume I: General Engineering.

April 17th, 2019 - SPE Member Price USD 485

The Petroleum Engineering Handbook has long been recognized as a valuable comprehensive reference that offers practical day to day applications for students and experienced engineering professionals.

April 20th, 2019 - Mr Richard S Henry

Mr RICHARD HENRY is an independent reservoir simulation specialist who is either out on a sailboat or teaching for PetroSkills in his spare time. He has degrees in industrial and petroleum engineering and has performed over fifty reservoir engineering studies over two decades on a variety of different simulation platforms, field sizes and reservoir types.

April 21st, 2019 - Mr William Dokianos

Mr WILLIAM BILL DOKIANOS has over 35 years experience in engineering, production and pipeline. He is a Professional Engineer in the states of Louisiana and New Mexico and holds a General and Oil Production and Processing Facilities PF 4 PetroSkills.

April 20th, 2019 - ECU offers innovative and practical courses across a variety of disciplines and we have a vibrant research culture. ECU is a leader in developing alternative entry pathways to higher education. Use the box below to search the archive.

April 22nd, 2019 - Chemical enhanced oil recovery (EOR) and particularly surfactant injection has recently received a great deal of attention. The suggested recovery mechanisms after injecting surfactants include wettability alteration and interfacial tension reduction.

August 23rd, 2019 - Avaya Auditorium POB 2 302 The University of Texas at Austin. Sponsored by Chevron. The Center for Petroleum and Geosystems Engineering (CPGE) at the University of Texas at Austin is pleased to host a day long meeting showcasing the current research being performed within CPGE.

April 20th, 2019 - EarthVision 10 Dynamic Graphics Inc is pleased to announce the release of EarthVision® 10.0. This release offers a number of completely updated modules that eliminate the need for the MKS Toolkit. EarthVision 10 provides an enhanced interface for generating well displays, import enhancements, bug fixes and many general visualization changes and improvements.

EarthVision 10 Dynamic Graphics Inc
Educational Services and Training Emerson US
April 9th, 2019 - Enhanced Skills Through Training

Improve your workforce with a full range of training options from Emerson’s Educational Services. Train new hires, improve your current workforce skills, or help your team adapt to new technology or products.

Applied Reservoir Engineering RE Virtual
April 20th, 2019 - Mr Richard S Henry

Mr RICHARD HENRY is an independent reservoir simulation specialist who is either out on a sailboat or teaching for PetroSkills in his spare time. He has degrees in industrial and petroleum engineering and has performed over 50 reservoir engineering studies on the development of different petroleum fields in various countries.

Petroleum Engineering Handbook Volumes I - VII

Petroleum Engineering MEng Hons London South Bank
April 17th, 2019 - This MEng Petroleum Engineering offers an integrated route that combines undergraduate and postgraduate levels of study over 4 years. The course passes you through the fundamentals of petroleum engineering and its industrial applications.

ANCOLD Member Login
April 18th, 2019 - This document has been prepared as a companion to the 2001 ANCOLD Guidelines on the Environmental Management of Dams. Since the 2001 guidelines were published, much has been learnt about the critical issues that arise environmental concerns for both dam practitioners and the broader community arising from the construction of new dams, dam upgrades or altered operational strategies.

Oilfield Review English Language Editions Schlumberger
April 20th, 2019 - English Language Editions Oilfield Review published by Schlumberger carries authoritative, relevant and informative feature articles on technology innovation and the science of E&P. Use the box below to search the archives.
