Microsoft Excel has a data consolidation feature that allows multiple tables to be consolidated into a single summary report. Consolidating the data often enables easier editing and viewing of information since it can be seen in aggregate form as a master spreadsheet. There are three basic ways to do this: Excel Spreadsheet Linking, Spreadsheets Audit, and Excel.

If you prefer online learning or live outside South Africa, look at our online MS Excel training courses.

Spreadsheet linking assists an Excel user to keep his Excel spreadsheets at a manageable size. Formulas within smaller spreadsheets will recalculate faster as large spreadsheets are generally unwieldy.

You can use Excel’s Consolidate feature to consolidate your worksheets located in one workbook or multiple workbooks into one worksheet. Below you can find the workbooks of three districts. Before you start, if your worksheets are identical, it's probably easier to create 3D references if you have one workbook or External References if you have multiple workbooks to consolidate your data.
