Abstract

Department of Computer Science
Columbia University

April 8th, 2019 - This is in contrast to most previous work which assumes that skin is homogeneous or composed of homogeneous layers. We demonstrate the accuracy and flexibility of our model by creating complex skin visual effects such as veins, tattoos, rashes, and freckles which would be difficult to author using only albedo textures at the skin's outer surface.

The Skin Deep Project
Science NetLinks

April 20th, 2019 - Description The Science Inside Skin created as part of the Skin Deep Project offers readers a closer peek at the body's surface. Inside they'll find information about the three layers of skin, how skin changes during a lifetime, various skin ailments ranging from acne to the three types of skin cancer, and sun...
Your Skin for Kids  
April 21st, 2019 – Melanin gives skin its color. The darker your skin is, the more melanin you have. When you go out into the sun, these cells make extra melanin to protect you from getting burned by the sun’s ultraviolet or UV rays. That’s why your skin gets tan if you spend a lot of time in the sun.

Making a Skin Model Out of Rice Krispie Treats – Eclectic  
April 17th, 2019 – The next day we attempted to make a skin model showing arteries, veins, sweat glands, nerves, and hair. The base was made out of Rice Krispie Treats. We used The Wonders Inside the Human Body as our guide because it is full of large descriptive pictures of the human body.
